OBJECTIVE

Full Stack Web Developer focused on JavaScript technologies. I'm a web developer with more than 5+ years of experience developing websites with HTML, CSS and JavaScript also with WordPress CMS, and web apps with ReactJS and Angular frameworks and services (REST API). I consider myself a technology and learning enthusiast. Currently, in order to improve my skills, I am focusing on new technologies based in cloud technologies and Devops culture.

WORK EXPERIENCE

Alcaldía de Barranquilla
Frontend Developer — (February 2021 - July 2021)

Development of an interface for an institutional management follow-up application for the planning secretary of the district of Barranquilla.
- Component and interface development with React JS
- Consumption of microservices generated to visualize the data in the database
- Development of administrative dashboard to visualize data and reports

The project achieved traceability of the information because previously the information was received through excel files, which made that at the time of reporting the information had errors and it was very difficult to unify that information to generate reports to the different control entities.
Tech-stack: ReactJS, Material UI, JSON, REST API, JavaScript.

Sempli
Frontend Developer — (September 2020 - October 2020)

With this model, the company was able to improve by 60% through data analysis to find less financially risky candidates when granting a new loan. Tropicode Team Capstone project to develop a _rst solution approach in Machine Learning to Sempli company. **Experience: data cleaning/treatment with Anaconda and Python, landing page layout design, and practicing infrastructure deployment as code with SAM aws services.
